

## Let Your Computer Do the Drawing!

Nothing is more tedious than creating a panel layout drawing, but we've made it almost fun! VIA Panel Builder LITE extracts data from your schematic drawing and gives you a list of devices to place in your panel. Footprint sizes are read automatically from Panel Builder LITE's parts database. You can paste full-scale representations into your panel layout with a click of the mouse! Panel Builder LITE also has tools for automatically creating terminal strips, eliminating the excruciating task of drawing little lines and editing all that text.

### Build panel layouts the point-and-click easy way!

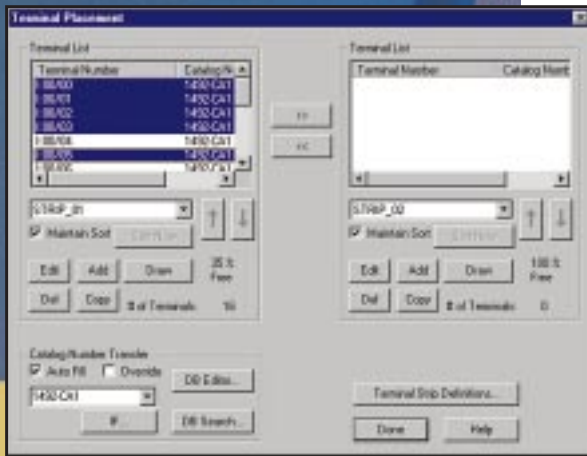

Call up this Panel Builder LITE floating toolbar in AutoCAD to automate panel layout drawing tasks.

# A Giant Leap Beyond Previous Products

*This easy-to-use dialogue box automates the task of creating terminal strips. Tedious line drawing and text editing are eliminated.*

If you use **Panel Layout LITE™**, **VIA Panel Builder LITE™** is more than just an upgrade! This is a totally rewritten product. It builds panel layouts automatically to make your life easier!

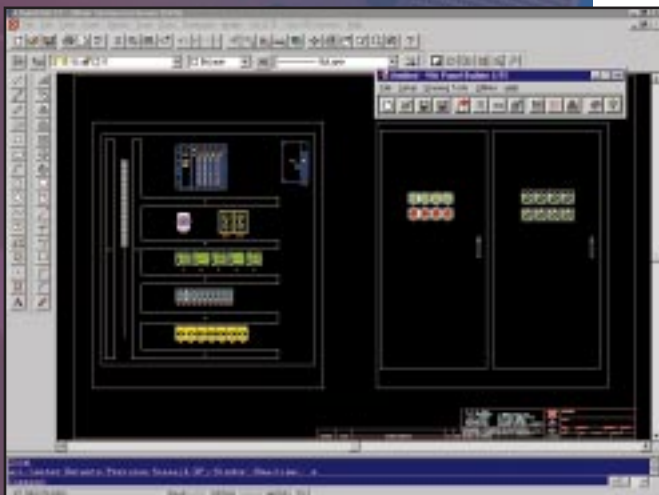

- **NEW!** It generates the device list directly from your schematic.
- **NEW!** It creates terminal strips automatically.
- **NEW!** Any design change made in Panel Builder LITE will be automatically updated in the schematic drawing.
- Panel devices appear as footprints, user supplied drawings, or manufacturer supplied drawings
- Panel Builder LITE calculates the device area needed in the panel.
- It includes a 200,000 parts database with size dimensions.

VIA Panel Builder LITE runs in AutoCAD and AutoCAD LT. Panel Builder LITE gives you the ability to create .DWG files for a proper layout without having to figure all the dimensions and block scaling.

## Order Yours Today!

Save time, reduce project costs, and eliminate headaches! At just \$395, VIA Panel Builder LITE is an incredible bargain.
